## **PETRON TURBO DIESEL EURO 5 POWERS “FUEL HAPPY” TRIP**

Loyal Petron customers, including members of the media, experienced first-hand the high-performance benefits of **Petron Turbo Diesel Euro 5** after being treated to an exhilarating 500 kilometer road trip from Kuala Lumpur to Pulau Duyong, Kuala Terengganu.

On board Mitsubishi, Isuzu, and Chevrolet 4x4 vehicles fueled by Turbo Diesel Euro 5, teams traveled across hilly terrain and rough roads for a total of 6 hours, including a pit stop at Pahang’s favorite waterfall in Jerangkang.

“We are proud of the results of the **Petron Fuel Happy Trip**, which put to test our cutting edge Turbo Diesel Euro 5. The road trip affirmed the fuel’s premium **TriAction Advantage** additives formula as it successfully boosted the performance of participating vehicles, giving the drivers and their passengers a satisfying road trip experience,” said Pn Faridah Ali, Head of Retail Business.

Turbo Diesel Euro 5 is a technologically-advanced diesel especially engineered with a premium additive system to provide improved engine performance for superior acceleration, better fuel economy, and reduced harmful exhaust emissions. Other benefits are complete combustion for maximum power, cleaner fuel injectors, reduced ignition delay, improved cold start performance, and better protection against engine corrosion.

“Since the rollout in September 2016, we have received excellent feedback from customers who regularly use Turbo Diesel Euro 5. This product signifies our passion in delivering innovative products for our valued customers, and is now available in 70 stations to meet growing demand. More importantly, it meets the ultra-low sulfur requirements of Euro 5 standards, helping improve air quality in the country,” continued Pn Faridah.

**A Subsidiary of Petron**

Significantly cleaner, Turbo Diesel Euro 5 has 10 ppm sulfur or 50 times less sulfur than the current Euro 2M diesel fuels, which contain 500 ppm (parts per million). Due to its very low sulfur content, Turbo Diesel Euro 5 produces less emission and meets the stringent requirements of global Euro 5 specifications.
