**PETRON LAUNCHES CLEANER & MORE POWERFUL FUEL, THE TURBO DIESEL EURO 5**

**KUALA LUMPUR** – Leading the oil industry in fuels technology with the launch of Blaze 100 Euro 4M early this year, Petron launched another innovative product with the roll out of another cutting edge fuel – the **Turbo Diesel Euro 5**.

**Turbo Diesel Euro 5** is a technologically-advanced diesel specially engineered with a premium additive system to provide improved engine performance for superior acceleration, better fuel economy, and reduced harmful exhaust emissions.

Significantly cleaner, **Turbo Diesel Euro 5** has 10 ppm sulfur or 50 times less sulfur than the current Euro 2M diesel fuels which contain 500 ppm (parts per million). Due to its very low sulfur content, Turbo Diesel Euro 5 produces less emission and meets the stringent requirements of global Euro 5 specifications.

Petron **Turbo Diesel Euro 5** is enhanced with premium additives – dubbed the **TriAction Advantage** - for extra power and gives smoother engine operation. It contains a combustion improver that allows efficient combustion and gives more power.

“We are proud to launch this innovative product and give more benefits to our customers in terms of better power, excellent engine protection, and better mileage,” said Head of Retail, Pn Faridah Ali.

“This fuel is also our modest contribution to ensure better air quality for all,” Faridah added.

Other benefits of **Turbo Diesel Euro 5** include:

- 1) Promotes complete combustion for maximum power
- 2) Cleans fuel injectors
- 3) Reduces ignition delay
- 4) Improves cold start performance
- 5) Protects against engine corrosion

**Petron Malaysia Refining and Marketing Berhad** (Company No:3927-V)  
(Formerly known as **Esso Malaysia Berhad**)

Level 12A, Menara I&P Tower 1, Jalan Dungun, Bukit Damansara. 50490 Kuala Lumpur. Malaysia.  
Tel. No: 03-2082 8400. Fax No: 03-2082 8582

**A Subsidiary of Petron**

Petron **Turbo Diesel Euro 5** is suitable for all diesel vehicles including passenger cars and commercial vehicles as it provides excellent cleaning action and formulated to withstand the extreme heat and high pressure of today's fuel injection systems.

“Our customers can expect more exciting and innovative products and service offerings in the coming months,” continued Faridah.

The Petron Turbo Diesel Euro 5 will be field tested in the upcoming Rain Forest Challenge (RFC). Considered one of the toughest motor races in the world, RFC is an endurance race for 4X4 vehicles. More than 50 vehicles will be powered by **Turbo Diesel Euro 5** as they brave the rough and unforgiving terrain between Kuala Lumpur and Pahang.

“**Turbo Diesel Euro 5** is now available at 14 stations in Klang Valley and Johor. We are in the midst of rolling out to more sites. By the end of December, it will be available at 70 stations.”
