**PETRON IS OFFICIAL FUEL & ENGINE OIL OF FIA FORMULA 4 SEA FINAL LEG**

**KUALA LUMPUR** – Leading Oil Company Petron Malaysia was named as the official fuel and engine oil partner of the Formula 4 South East Asia (F4/SEA) Championship final leg in Malaysia from 20 to 22 January 2017.

The Formula 4 South East Asia is certified by the Federation Internationale de l'Automobile or FIA, the International sanctioning and administrative body for motorsport created for young drivers around the world to step up to the world championship of a single seat racing.

As the fuel and engine oil partner, Petron will fuel F4 cars with its high performance gasoline, Blaze 100 Euro 4M and high technology engine oil Blaze Racing Fully Synthetic during the 3-day finale championship. This is the first time Petron will provide fuel and lubricants for a formula racing motorsport.

“We are truly honoured to partner with F4/SEA as its fuel and lubricants partner. This partnership is another milestone for us in gaining a foothold in motorsports, where it is a perfect testbed for our superior fuel products. We are proud to introduce our most advanced product innovation Blaze 100 and Blaze Racing engine oil to the world racing championship,” said Pn Faridah Ali, Head of Retail.

First in fuel technology and innovation, Petron made its mark launching the first and only 100RON premium gasoline in the Malaysian market last year in January. Blaze 100 known for its properties of a high performance fuel is formulated with **TriAction Advantage** - a triple action formula that delivers better power, better engine protection and better mileage, providing for excellent engine responsiveness, optimum power and faster acceleration. Blaze 100 is produced at the Petron Port Dickson Refinery.

The final round of the F4/SEA will see the FIA-F4 homologated race cars complemented with Petron Blaze Racing engine oil for an optimum engine protection. Blaze Racing is specially formulated with TS3™ (Thermal Stress Stabilizing System), an exclusive technology to keep the oil stable at extreme temperatures and engine stress. Blaze Racing engine oil is designed to meet the requirements of most modern vehicles including high performance vehicles.

Promoted by the Asian Autosport Action (AAA) group, the F4/SEA offers a cost-effective first step to an FIA - certified career ladder in formula racing. The F4/SEA program focuses on driver experience and development by ensuring a level playing field in a one make FIA single-operator

Championship using FIA-F4 homologated race cars and engines. The 2016 F4/SEA calendar kicked off last August with the first event at the Sepang circuit in Malaysia and continued the series in Philippine, Indonesia, Taiwan and Thailand before concluding in Malaysia.

“We hope drivers will experience and appreciate the power of the Blaze 100 and cleaner engine from Blaze Racing engine oil. We look forward to introducing more innovative fuels in the future,” Faridah concluded.
