Petron Malaysia and Progressture Solar Forge Long-Term Alliance to Drive Clean Energy Transition

100 Petron service stations will be equipped with solar panels under a clean energy partnership

KUALA LUMPUR – Petron Malaysia is progressing its path towards a low-carbon future through a strategic partnership with Progressture Renewables Sdn Bhd (Progressture Solar). Under this long-term partnership, 100 Petron service stations nationwide will be equipped with solar panels photovoltaic (PV) systems, reinforcing Petron’s commitment to Malaysia’s net-zero 2050 ambitions.

Once completed, the solar systems are projected to:

- Generate up to 3,321 MWh of renewable energy annually, enough to power approximately 953 Malaysian households every year.
- Cut up to 2,517 tonnes of carbon emissions annually, equivalent to removing 587 cars from the road or planting 62,933 trees annually.
- Deliver cumulative emissions reductions of more than 62,925 tonnes over the project’s full lifecycle.

“This partnership reflects our commitment to integrating sustainability into every facet of our operations. By introducing solar power to our stations, we are making an immediate and measurable impact on emissions reduction, particularly Scope 2 emissions. This is part of Petron’s journey in reducing carbon emission and supporting Malaysia’s Net-Zero 2050 goal, in supplementing power to our operations in a cleaner and more resilient way,” said Mohd Nizam Mansor, General Manager of Petron Malaysia.

Ng Yew Weng, Co-Founder and Chief Operating Officer of Progressture Solar, said “As a leading clean energy partner, we believe this collaboration represents an important step forward for the retail fuel industry. It demonstrates how renewable energy can deliver real operational impact while supporting Petron’s decarbonisation efforts and Malaysia’s journey towards Net Zero.”

As part of the agreement, Progressture Solar, Petron’s net-zero partner, will own, manage, and maintain the operation of the solar assets during the contract period.

This initiative is a cornerstone of Petron Malaysia’s sustainability roadmap, highlighting how collective action and long-term partnerships can power the nation’s transition to cleaner energy and create a lasting impact for generations to come.

About Petron Malaysia

Petron Malaysia is a leading company in Malaysia's downstream oil market. Its 88,000 barrel-per-day Port Dickson Refinery produces a wide variety of world-class fuels, which is distributed through 10 terminals of Petron subsidiaries in Malaysia. Through more than 830 stations nationwide, the company retails premium fuels, namely Blaze 100 Euro 4M, Blaze 97 Euro 4M, Blaze 95 Euro 4M, Turbo Diesel Euro 5 and Diesel Max Euro 5. In addition, Petron also offers lubricants, convenience stores, cooking gas and EV charging facilities, all under one roof. As a progressive oil company in Malaysia, Petron aspires towards a sustainable energy-secured nation where everyone’s journey is fueled by opportunities for meaningful experiences.
